SOLVING TOMORROWS CHALLENGES TODAY

PEOPLE   INTEGRITY   TEAMWORK   CUSTOMER SATISFACTION

COLSA is a proven leader in innovative technologies that maintains our commitment to customer service above all else. Established in 1980, COLSA has remained steadfast in our commitment to one goal: to serve the company's clients with dedication and excellence.

INNOVATION CENTERS

- **The COLSA Software Factory®** develops and deploys software products quickly and cost-effectively, utilizing an agile process that prioritizes stakeholder participation for delivering high-priority features.
- **Cyber Solutions & Innovations Lab** offers a fully virtualized environment accessible remotely, providing a dynamic simulation of both enterprise networks and public operating spaces to foster innovation and advance cyber security solutions.
- **Data Analysis & Computational Sciences (DACS) Lab** encompasses diverse research and development environments, enabling the analysis of operational mission data and the creation of mission-specific prototypes.
- **Scientific Computing Lab** is a central hub for cutting-edge research, development, and testing of scientifically-oriented, adaptable hardware and software.
- **StormWorks** comprises a team of industry experts who specialize in addressing contemporary threats by conducting research, drone development, and operations.

CAPABILITIES

- **Cyber & Information Warfare:** Seamlessly integrating people, processes, and cutting-edge technology to achieve and sustain Information Dominance.
- **Data Science:** Delivering advanced capabilities in support of critical mission and operational requirements.
- **Enterprise Information Services:** Delivering modern, secure, and scalable solutions and services.
- **Federal Support Services:** Providing comprehensive system life-cycle solutions with expert analytical services and program management.
- **Systems & Software Engineering:** Executing agile, advanced systems, and software engineering solutions worldwide.
