- AS9100D
- ISO 9001:2015

Strategic Capital:

- Battle Investment Group

ARCTOS is a full life cycle Technology Solutions provider of:

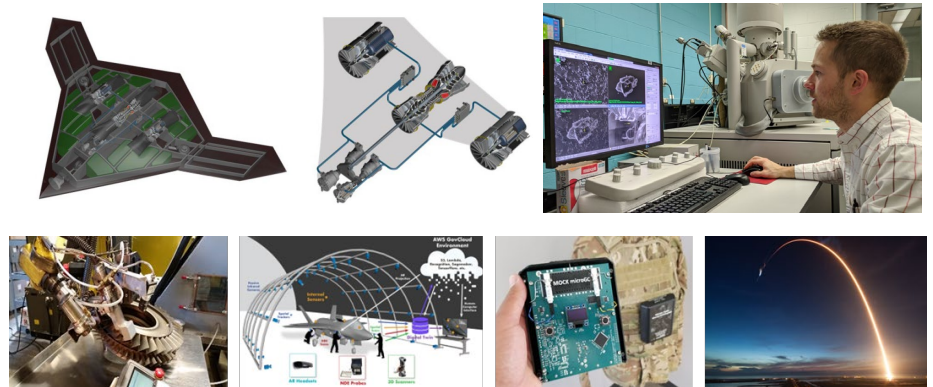

- Technical program management for federal customers
- Research, technology development, and prototyping
- Product design, testing, integration, and deployment
- Studies/analyses for technology investment and insertion

Core Competencies:

- Propulsion and power technologies
- Materials, devices, and air vehicles
- Agile and additive manufacturing
- Digital engineering and systems analysis
- Expeditionary and airbase technologies
- Space launch safety and risk analysis
- Workforce development and outreach
- Meetings and administration support

Technology Product Lines:

- Advanced assessment and restoration technologies for sustainment of mission-critical aerospace systems/parts
- Aerospace vehicle risk analysis tools supporting test range operations and space launch/reentry operations
- Agile/additive manufacturing technologies and systems (including novel and expeditionary metal AM systems, and versatile in situ sensing and analytics for quality control)
- Air and water monitoring solutions (e.g., autonomous detection and alerts for chemical warfare agents and pollutants)

ASTRO Pools:

- Research Pool: 47QFCA-22-D-0393
