- GSA-approved classified storage

**Company Capability Overview**

- Maintenance Repair and Overhaul (MRO) for rotary wing, fixed wing, manned and unmanned aircraft underpinned by our in-depth experience in mechanical, structural and electrical capabilities on airframe and components. Development, maintenance and modification services. Military, commercial, international customers.
- Provides design, development, engineering, systems integration, production, installation, rebuild, overhaul, reset, maintenance, logistics, contractor logistics support and technical services.
- Provides upgrade and retrofit kits, A/B kits, test support, and equipment installation in facility or at remote sites.
- Conducts feasibility studies, prototype development, testing, Low-Rate Initial Production, and Full-Rate Production.
- Manufactures/procures and integrates mechanical and electrical components for many major aviation systems.
- Support functions: ferry flights, kitting, shipping, storage, logistics.
- OEM-like certifications (ISO/AS), quality/QMS system, approved processes (DCMA/DCAA/FAA), established supply chain procedures, qualified personnel, and fully-equipped facilities.
- Hundreds of programs successfully executed.
- **SES' Training Division** develops and delivers aviation training and support for newly-fielded production, post production or modified aviation systems and subsystems. Includes classroom, simulator and flight training for aircrew and maintainers. SES creates materials, provides instructors, and conducts classes, including over-the-shoulder, on-the-job training.
- Training topics: Flight, flight standardization, simulation training, mission rehearsal, aviation operations, maintenance training, battle command systems, and air traffic control.
- All training IAW approved Regulations, approved Plans of Instruction, Flight Training Guides, Student Handouts, Aircrew Training Manuals and the supported entity's Standard Operating Procedures.
- Training staff: Subject matter experts, instructors, courseware developers, test administrators, and test examiners. Highly-qualified, experienced Instructor Pilots and Maintenance Instructors.
- Flexible locations: At SES, designated school/institution, or CONUS/OCONUS location. Mobile Training Teams provide equipment, pilot & maintainer training while sustaining fielded aircraft. Training in English, with interpreters as needed.
