DCMA Certified Accounting and Purchasing

Our company's reputation is excellent; we have **never received a corrective action** from our government customer and have superior CPARS. Our services are highly valued by US Government technical program managers responsible for managing international contracts. We work to provide excellent, long-lasting solutions, and focus on delivering outcomes-based solutions to our customers.

**Who we are:**

Resicum International LLC is a women/veteran owned small business currently operating in foreign (Qatar, Indonesia, Tunisia) and domestic operations in Florida and Alabama with corporate offices in Virginia.

Resicum International was founded in December 2014 by two US Army veterans with many years' experience in the American defense industry. The team's experience in military aviation training and maintenance and foreign military sales has allowed Resicum to be successful in managing and maintaining the Taiwan's fleet of UH60M helicopters. Building on that experience, Resicum was awarded a seat on the US Army SATMO Aviation IDIQ contract for Foreign military acquisition of aircraft. Here, the team applied their knowledge of US government contracting law to develop policies, procedures and a reputation that sets Resicum apart from the pack while performing flight instruction and maintenance instruction in Indonesia, Qatar and Tunisia. Resicum was awarded the Counter Narco-terrorism and Global Threats (CN&GT) IDIQ contract where we have successfully provided fixed wing ISR/MSO/ITC training to partner nation military members.

- **General Aviation Maintenance**

Resicum, through our Part 145 certification, operates aviation repair stations at Jack Edward National Airport in Gulf Shores Alabama and Craig Field in Selma Alabama. Our Maintenance, Repair and Overhaul (MRO) facilities service piston, turbo prop to include Beechcraft King Air and small jets as well as rotary wing aircraft. We are a US government designated Bell service center and provide a comprehensive avionics service inclusive of full panel design and installation.

- **Government Owned Aircraft Inspections and Maintenance**

Resicum has the capability to perform required inspections and maintenance on multiple fixed wing and rotary platforms.

- **Military Aircraft Maintenance and Maintenance Training**

Resicum has the capability to perform phase maintenance on the UH-60 series, AH-64 series, CH-47/46 series and the OH-58 series platforms.

- **Military Flight Instruction/Training**

Resicum's flight instructors are current and qualified to deliver multiple platform training at our DCMA and FAA certified facility in Gulf Shores Alabama or worldwide as part of a Mobile Flight Training Team

- **Introductory to Advanced Flight Training Curriculum Development**

Resicum supports our customers by completely building and delivering task specific course material and Curriculum and by working with our customer's leadership and program personnel to develop an internal curriculum development capacity. We build doctrinally sound and in-depth course material, approved by the US government used to develop and train our customer's future leaders, integrating our strong understanding of military aviation history, doctrine and training with tip of the spear technology.
