Premier Cloud Partner

One of only a handful of companies worldwide that have achieved Premier status in all three leading cloud platforms.

Azure Expert MSP

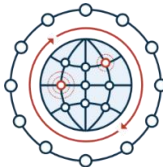

Company Overview

At SMX, we are a team of technical and domain Experts dedicated to enabling your mission. From priority national security initiatives for the Department of Defense to highly assured and compliant solutions for commercial clients, we understand that digital transformation is key to your future success.

Cloud Solutions – SMX delivers highly secure digital transformations through cloud-enabled solutions across the full life-cycle of infrastructure, data, and mission applications with expert architecture, secure managed services, and integrated resale platforms.

Global C5ISR – For U.S. forces around the world, closing intelligence gaps is essential to assuring the mission, whether the goal is countering an adversary or delivering humanitarian aid. That is why SMX has changed how C5ISR services are deployed and fielded globally.

Engineering & IT – Our solutions for networking, information management, and communications are built on our extensive, proven capabilities. We support some of the nation's most advanced and secure air, land, sea, and space defense programs.

Who We Serve

SMX is committed to ensuring the highest levels of customer satisfaction, providing world-class solutions alongside our customers. We have maintained a reputation for delivering positive mission impact, supporting the critical missions of DoD; Intelligence Community; Federal, State, and Local Government; Education; Fortune 500, and other commercial customer requirements for more than two decades.

Key ASTRO Contract Capabilities

SMX is at the forefront of the evolution of cloud and delivering highly secure and scalable technology solutions. We possess demonstrated experience supporting Mission-Focused Engineering, Operations, Development, and Cybersecurity initiatives for Federal and commercial customers – delivering compliance in the most complex environments – and have helped transform enterprises into data-centric powerhouses with our advanced capabilities.
